Dear Sir/Madam/Student,

The decreasing percentage of girl students in higher education in the twenty first century is really a great concern for India as a nation. Any nation's future and consequently the world's future depends upon the women who are naturally gifted in terms of patience, creativity and innovation. That is why for women's growth and development we as society must give priority to their education. It is observed that after primary and secondary education women face many difficulties and barriers to reach and complete their higher education. By taking it into consideration, the founder President of our institution Late Shamraoji Deshmukh (Kaka) decided to open up an educational Institute in Parli area. As a result of it our girls by acquiring higher education have soared in the different walks of life. This is a very proud thing for us. We feel that the efforts that we have put in their development have borne the fruits. It is a feather in the cap of our Institute.

The students who have been successful in their lives can really guide the younger ones. Their experiences can inspire and motivate them in the present time. Their experiences of failure and success can prove to be a lighthouse for our graduate class students. By thinking over this the department of Physics and all Science departments decided to hold a three day online lecture series of our ex-students. In this online lecture series, the girls who received education from our College and then later on pursued higher education are going to share their experiences would definitely help our graduating students.

Due to the Covid -19 and it's variants, it is difficult to arrange this type of lectures in the offline mode. But this could be arranged in the online mode. This programme is not only a feast of knowledge and experience sharing but also a kind of get together of ex-students and present students. They all are going to share their journey in achieving the aim and dream they had set once upon a time. This sharing shall boost the confidence level of our students.

Three Days virtual Lecture Series

"This is How We Developed!"
